

Hot Metal® Diverse Applications

Hot Metal® is a versatile, functional and durable metal laminate suitable for diverse applications. Hot Metal® is an innovative metal laminate that produces a finish with striking dimensional effects and is distinct and unequalled in its look. Using patent technology, Hot Metal® is created by combining metal with trend colours and handcrafted patterns. Hot Metal® is recommended for internal vertical applications. Apart from its use in sheet format, it has been cleverly applied and adapted to give a wow factor to various interior design features and details.

Enter a new dimension with Hot Metal® and satisfy the demand for something different in your next design;

Hot Metal's® diverse applications include;
