

Hot Metal® features US Hair Care - another example of a fine hand made laminate

Colour: Fire Fly Red, Pattern: Random.

This Hot Metal® feature wall for US Hair Care, is another fine example of the impact Hot Metal® can achieve when applied to the retail sector. As well as stunning feature walls, Hot Metal® is favoured by architects, designers and shopfitters for its many useful and extensive applications and for its attention seeking abilities. Other applications include; feature doors, signage, skirtings, ceiling tiles, reception desks, counters and visual merchandise.

Hot Metal® is an expressive, distinct, solid metal laminate that produces striking dimensional effects. It is the perfect laminate for showcasing products and services within the retail, commercial and event sectors.

Hot Metal® is recommended for internal vertical applications and decorative horizontal surfaces. It is a light responsive metal laminate producing amazing illusory effects.

For the architect and designer, Hot Metal® is a product that motivates the creative design process. It is installer friendly and requires minimal maintenance to retain its outstanding appearance.

Hot Metal® is a hand made laminate and is proudly Australian designed and manufactured by STEW Pty Ltd.
