

## HOT METAL AT EXTREME CINEMA

Extreme cinema is exciting entertainment and Hot Metal is an exciting metal laminate that offers great visual impact. Hot Metal colours Fire Fly Red and Pewter in the random pattern were used to create dramatic feature doors and signage to the cinemas. These Hot Metal colours and pattern were not only chosen to enhance the interior but to add to the entertaining experience of the movie goer. In this project, interior lighting is strategically positioned onto Hot Metal to highlight its powerful dimensional effects and outstanding visual qualities.
