

Hot Metal® Laminate Gives a Bright Future.

Hot Metal colour Champagne - reed pattern

In September, Hot Metal was proud to attend the official opening of the Dunn & Lewis Complex at Ulladulla, located on the South Coast NSW. The Dunn & Lewis Youth Development Foundation responsible for the project, believes that the Complex will positively contribute to young people's personal, social and vocational wellbeing. The Complex has been designed primarily as a permanent memorial for those who lost their life in the Bali attack. It is a building project that has inspired thousands of people to work together to make the future brighter by providing a better life for today's children. The Complex will serve as a unique concept and hopes to be used as a valuable prototype for rural and regional towns with the aid of Government and community effort. With an emphasis on youth having a bright positive future, it stands to reason why Hot Metal laminate was chosen for strategic areas in the first stage of the Complex. Hot Metal Champagne in the reed pattern was used for its outstanding dimensional metallic finish. It gives the foyer a stylish impact and complements other quality materials used, such as glass walls that function as a water feature. From the foyer Hot Metal counter fronts continue the wow factor in the reception area of the Bowling Alley. In an environment that provides great entertainment, social and sporting activities for all ages, Hot Metal laminate was chosen to give the Bowling Alley a playful personality and function as a durable surface finish requiring little maintenance. In addition, Hot Metal was specified because it is an Australian made and owned product.

Project Designer: Andrew Bell - Milton Drafting & Design
Project Construction: Jason - Gibraltar Constructions

Hot Metal®the coolest trend in laminate.

Hot Metal® is Australian designed and manufactured, using handcrafted techniques. Hot Metal® is Patent protected.
